

# AutoML Capital

Sector **Fintech / WealthTech** | Website <http://automlcapital.com/>

## Introduction

AutoML Capital democratizes Data Science in WealthTech as first of its kind in Hong Kong to address the needs and wants of small-scale Asset Managers. With its core technology in accelerating data-mining processes and developing a computerised self-learning system, AutoML applies its self-developed algorithm in innovative use cases across ESG, Crypto and specific geographical markets. The core plug-and-play AI modules function to 1) forecast asset class relative performance, 2) perform dynamic asset allocation and portfolio construction and 3) trigger smart protection mechanism through taking portfolio risk off when severe market volatility is predicted.

## Founder – Rebecca Lim

**Rebecca Lim**, Rebecca Lim is the founding partner of AutoML Capital and Automated Machine Learning Limited. She is a physicist by training and obtained her undergraduate and master degree in Physics from the University of Oxford, specialising in Atmospheric and Particle Physics. She then pursued a career in Banking and Finance across Sales and Trading and Private Banking in Hong Kong and London across the areas of market risks, derivative pricing, portfolio constructions etc. Her passion in Science, R&D motivated her to start the research company Automated Machine Learning Limited in 2017 – to simplify the processes of building machine learning modules. This company later became the building block of the AutoML Capital Limited, an SFC Licensed company that made use of the automated machine learning pipelines, focusing the use case in WealthTech.

Rebecca is a mother of 3 young kids and also a sub-4hour marathon runner. She puts her passion in Science and Technology to encouraging young women to take on bigger technology roles in the industries.
