### *About IT Channel*

With its headquarters in Hong Kong, IT Channel (Asia) Limited is one of Asia Pacific's leading Professional Service Network Providers. We provide our clients with the most advanced worldwide technological know-how and best local expertise to optimize the return on their technology investment and to develop their business in this competitive global market.

### *Services that We Offered*

#### 1. Artificial Intelligence (A.I.), Big Data and Internet of Things (IoT) Solution

The Internet of Things (IoT) is a key development across industries, and many businesses attempt to leverage IoT and combine it with artificial intelligence and big data in their operations and daily duties. A.I., Big Data, and IoT solution are the strongest services that IT Channel is providing. We offer these cutting-edge technologies to help our clients better develop their business.

#### Artificial Intelligence:

- We will utilize A.I. Machine Learning to improve our client's predictive analytics by allowing the computer to perform the analysis and forecasting to discover the business's hidden potentials and values.

#### Big Data:

- We will utilize big data to help clients to develop an organization-wide data-driven culture and acquire powerful insights from data that can be transformed into business values.

#### Internet of Things:

- Smart Building - Smart Campus - Smart City. We will help our clients to maximize resource usage, reduce human effort, improve efficiency, and save cost by utilizing IoT to connect products and services with digital intelligence.

## 2. Business Intelligence and Data Warehousing solution
